Sizes
30 .. 45

Weight
0.075 kg .. 0.29 kg

Gripping force
55 N .. 310 N

Stroke per finger
3 mm .. 5 mm

Workpiece weight
0.25 kg .. 1.1 kg

Application example

Handling device for direct mounting on a robot for screwing in sealing plugs

1 MPZ 45 3-Finger Centric Gripper

2 DDF 31 Rotary Feed-through

Grippers for small components

Small 3-finger centric gripper with base jaws guided on T-slots

Area of application

For universal use in clean to slightly dirty working environments, especially suitable for gripping small workpieces

Your advantages and benefits

T-slot guidance

for precise gripping with high bearing-load capacity

Finger position monitoring

also possible via FPS

Air supply via hose-free direct connection or fitting connections

for the flexible supply of compressed air in all automation systems

General information on the series

Working principle

Wedge-hook kinematics

Housing material

Aluminum alloy, hard-anodized

Base jaw material

Steel

Actuation

Pneumatic, with filtered compressed air (10 µm): Dry, lubricated or non-lubricated
Pressure medium: Required quality class of compressed air according to DIN ISO 8573-1: Quality class 4

Warranty

24 months

Scope of delivery

Centering sleeves, O-rings for direct connection, assembly and operating manual with manufacturer's declaration

Gripping force safety device

with either mechanical gripping force safety device or SDV-P pressure maintenance valve

Sectional diagram

- 1 T-slot guidance**
precise gripping with high load-bearing capacity
- 2 Kinematics**
wedge-hook principle for high power transmission and synchronized gripping
- 3 Housing**
weight-reduced through the use of a hard-anodized, high-strength aluminum alloy
- 4 Drive**
pneumatic, powerful and easy to handle

Function description

The piston is moved up or down by means of compressed air. Through its angled active surfaces, the wedge hook transforms this motion into the lateral, synchronous movement of the 3 base fingers.

Options and special information

Small, compact 3-finger centric gripper for fast gripping applications.
Monitoring of the smallest differences in stroke possible via FPS system.

Accessories

SCHUNK accessories — the suitable complement for the highest level of functionality, reliability and controlled production of all automation modules.

Centering sleeves

Fittings

MMS magnetic switch

Quentes plastic inserts

W/WK/KV/GK sensor cables

HKI gripper pads

V sensor distributors

SDV-P pressure maintenance valves

Finger blanks

FPS flexible position sensor

① For the exact size of the required accessories, availability of this size and the designation and ID, please refer to the additional views at the end of the size in question. You can find more detailed information on our accessory range in the "Accessories" catalog section.

General information on the series

Gripping force

is the arithmetic total of the gripping force applied to each base jaw at distance P (see illustration), measured from the upper edge of the gripper.

Finger length

is measured from the upper edge of the gripper housing in the direction of the main axis.

Repeat accuracy

is defined as the spread of the limit position after 100 consecutive strokes.

Workpiece weight

The recommended workpiece weight is calculated for a force-type connection with a coefficient of friction of 0.1 and a safety factor of 2 against slippage of the workpiece on acceleration due to gravity g. Considerably heavier workpiece weights are permitted with form-fit clamping.

Closing and opening times

Closing and opening times are purely the times that the base jaws or fingers are in motion. Valve switching times, hose filling times or PLC reaction times are not included in the above times and must be taken into consideration when determining cycle times.

MPZ 30

Pneumatic · 3-Finger Centric Grippers · Grippers for Small Components

Gripping force, I.D. gripping

Gripping force, O.D. gripping

Finger load

① Moments and forces apply per base jaw and may occur simultaneously. M_y may arise in addition to the moment generated by the gripping force itself. If the max. permitted finger weight is exceeded, it is imperative to throttle the air pressure so that the jaw movement occurs without any hitting or bouncing. Service life may be reduced.

Main views

The drawing shows the gripper in the basic version with open jaws, the dimensions do not include the options described below.

- A,a Main/direct connection, gripper opening
- B,b Main/direct connection, gripper closing
- ① Gripper connection
- ② Finger connection

① The SDV-P pressure maintenance valve can also be used (see "Accessories" catalog section) for I.D. or O.D. gripping as an alternative or in addition to the spring-loaded, mechanical gripping force safety device.

Hoseless direct connection

- ③ Adapter
- ④ Gripper

The direct connection is used for supplying compressed air to the gripper without hoses. Instead, the pressure medium is fed through bore-holes in the mounting plate.

AS/IS gripping force safety device

Springs integrated in the gripper ensure a minimum gripping force even if there is a drop in pressure.

FPS measuring system

17 Cable outlet

The FPS flexible position sensor can distinguish between five freely programmable ranges or switching points for the stroke of a gripper and can be used in conjunction with a PC as a measuring system.

Finger blanks

Finger blanks for customized subsequent machining
